

Carbon Storage Potential in Taiwan

Estimated CO₂ storage capacity in the western part of Taiwan :

- 14 onshore oil and gas structures:
2.8 Gtons - **CPC**
- Coastal and offshore deep saline aquifers:
(NW: 6 ~ 11.2 ~ 43.6 Gtons)
(SW: 3 ~ 5.8 ~ 24.4 Gtons) - **ITRI**
- Coastal and offshore deep saline aquifers:
NW 30.6 and SW 10.3 Gtons - **NEP**

Carbon Capture Pilot Plant in Taiwan
